[Portfolio](#)

SUMMARY

Final-year B.Tech student passionate about Machine Learning, Data Analytics, and Software Development. Skilled in Python, SQL, Pandas, NumPy, Matplotlib, and Seaborn for data analysis and visualization. Experienced in EDA, data preprocessing, feature engineering, and building machine learning models. Strong problem-solving abilities with knowledge of C++, Data Structures & Algorithms, and Object-Oriented Programming, while actively expanding expertise in NLP and AI applications.

PROFESSIONAL EXPERIENCE

Groveus, Siliguri: Web Developer [\[Certificate\]](#)

June 2025 – September 2025

Internship (3 months)

- Developed responsive web interfaces using HTML, CSS, and Bootstrap while following SDLC practices.
- Worked on client projects, implementing front-end designs and integrating them with CodeIgniter backend.
- Managed real-time client feedback, ensuring timely updates and consistent quality.
- Delivered production-ready logistics websites with a focus on performance and best practices.

TECHNICAL SKILLS

Languages: Python, SQL, C++, JavaScript

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering, Model Evaluation, Supervised Learning, Regression, Classification, Clustering

Data Analytics & Visualization: Matplotlib, Seaborn, Power BI, Statistics, Hypothesis Testing, EDA, Data Cleaning

Databases: PostgreSQL, MySQL

Frontend Development: HTML, CSS, Bootstrap, Tailwind CSS

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP)

Tools & Technologies: Git, GitHub, VS Code, Jupyter Notebook

Soft Skills: Teamwork, Adaptability, Active Listening

PROJECTS

Customer Shopping Behavior Analysis | Python, SQL, Power BI [Github](#)

- Cleaned and transformed retail shopping data using Python and Pandas.
- Performed business analysis using SQL queries in PostgreSQL.
- Built an interactive Power BI dashboard with KPIs, sales trends, customer segmentation, and revenue insights.
- Generated business reports and recommendations based on customer purchasing behavior and sales analysis.

Heart Disease Prediction System | Python, Scikit-learn, Streamlit [Github](#)

- Built a machine learning model using **K-Nearest Neighbors (KNN)** to predict heart disease risk from patient health data.
- Conducted data preprocessing, feature engineering, and exploratory data analysis (EDA).
- Evaluated model performance using accuracy, confusion matrix, and classification metrics.
- Developed and deployed an interactive Streamlit application for real-time predictions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Siliguri Institute of Technology

Graduating July 2026

Avg CGPA: 7.8

Maynaguri Girls' High School

West Bengal Board of Secondary Education (Percentage: 83%)

2020

West Bengal Council of Higher Secondary Education (Percentage: 86%)

2022

ACHIEVEMENTS

- Leetcode 150+

[leetcode](#)
